**AUSTRALIAN HARMONIZED EXPORT COMMODITY CLASSIFICATION
(AHECC)
1 January 2003 replacement pages**

Attached are the replacement pages for the AHECC which become operative on 1 January 2003.

The AHECC is compiled by the ABS and is designed for use by exporters, customs brokers and freight forwarders for the classification of goods when providing export declarations to the Australian Customs Service, and to assist users in the interpretation of export statistics published by the ABS.

The 2002 edition of the AHECC became operative on 1 January 2002. It incorporated extensive changes arising from a review, by the World Customs Organization, of the international Harmonized System 6-digit categories. Replacement pages updating this manual for changes to the classification from 1 July 2002 were released on the ABS website on 18 June 2002.

Users were advised that the 1 January 2002 edition of the AHECC would be the final version issued in printed form. Future replacement pages to update the classification and explanatory notes, normally issued six monthly, and subsequent new editions, would be released electronically, free of charge.

Current copies of the AHECC can be updated by printing these replacement pages and including them in the manual. Classification items affected by the 1 January 2003 changes are indicated by an asterisk * in the margin. The date of effect of these changes is the issue date at the bottom of the page.

A completely updated electronic version of the AHECC is available on the ABS website. To access the complete manual, go to the ABS website <www.abs.gov.au>, then select Themes, International Trade. Users should check the International Trade theme page for the most recent information relating to the AHECC.

Any queries should be referred to the contact officers listed on page E/19. If you have any difficulties accessing the AHECC on the ABS website, please contact the ABS Classification Manager on (02) 6252 5409 or email <international.trade@abs.gov.au>.

1.3 CLASSIFYING GOODS TO THE AHECC

Goods are classified according to the general rules for the interpretation of the Harmonized System, as presented in Section 1.2. The following notes are provided to assist in understanding the HS classification and in determining the correct AHECC items to be used in making Customs export declarations. They are not exhaustive but try to cover the most important aspects of the classification of goods.

CLASSIFICATION STRUCTURE

The AHECC has a structure comprising four levels, namely, sections, chapters, headings and sub-headings. At the section level, the main purpose is to provide a limited number of categories which will provide a broad picture of the goods being internationally traded. The chapter (2-digit level), heading (4-digit level) and sub-headings (6-digit level) provide increasingly detailed dissections of the broad categories.

Sections 1 to 15 classify raw materials including manufactures classified by material. Sections 16 to 21 classify manufactures not classified by material.

Goods obtained from the same material are generally grouped together and are arranged progressively from the raw material or less manufactured product through to the finished or more highly manufactured product.

Certain categories of exports, for example, goods re-exported after being imported for industrial processing and some ships and aircraft stores, are not classified in the normal manner and are included in either Chapter 98 or 99. For further details see Section 1.4.

CLASSIFICATION PRINCIPLES

The following general principles should be followed when classifying goods:

- determine the broad category to which the goods fall for example, raw materials or semi-manufactures and finished goods;
- select the appropriate section and chapter from the Summary of Classification, Section 2.1;
- review the Section and Chapter notes, as these notes can affect your classification decision;
- examine the 4-digit headings in the chosen chapter to determine the most appropriate 6-digit headings; and,
- consider all the detailed 8-digit classifications under the selected 6-digit item to select the most appropriate code.

The following points should also be borne in mind when classifying goods:

- classification by end-use can at times be misleading: a given commodity could, perhaps, be applied to a variety of end uses, for example, cut timber. Products of this nature should therefore be classified according to their material content; and,
- in some instances, however, the end-use is very clear, and the value-added in adapting the commodity for that end use high. In such instances, classification by end use is appropriate, for example, *typewriter ribbons of silk* not 5007.20 'Fabrics of silk'.

For further details see Section 1.2.

CLASSIFICATION OF PARTS

When classifying parts it is important to consider:

- parts for general use do not take the classification of the whole goods unless indicated to the contrary by a heading at the 4-, 6-, or 8-digit level for example, 7315 'Chain and parts thereof, of iron or steel';
- where parts can be identified as being mainly for use with particular machines or apparatus they are classified under the same 4-digit heading as that particular machine or apparatus but not necessarily under the same 8-digit AHECC item; and,
- when a part is given a specific item number in the AHECC that item should be used even when the part is for a specific machine or apparatus. However, the preceding point applies if the part is in a single consignment of mixed parts of what is essentially a complete machine. For example, timing gears for railway locomotives should be entered specifically as timing gears (AHECC item 8483.40.10) not as parts of locomotives (AHECC item 8607.91) unless they come in a single consignment with other parts for assembly of an essentially complete locomotive.

FURTHER ASSISTANCE

If you require assistance in classifying goods for export contact the AHECC Advisory Service within the Australian Customs Service on 1300 363 263. Further information about contacting the Customs AHECC Advisory Service is outlined on page E/19.

1.4 CHAPTERS 98 AND 99 OF THE AHECC

The content of Chapters 1 to 97 of the AHECC is defined in the Harmonized System, but the ABS has included two additional Chapters in which goods are not classified on a commodity basis.

CHAPTER 98 Special transactions and commodities not classified according to kind

This chapter includes:

- donated or bequeathed goods;
- goods re-exported from Australia after being imported for industrial processing;
- goods exported from Australia which are to be re-imported after industrial processing;
- exports of mixed goods (including ship and aircraft stores being loaded on foreign registered ships and aircraft) where four or more commodities in a single consignment are reported, with a value of less than \$5,000 for each commodity (excluding goods in bond subject either to excise or Customs duty). Exports coded to AHECC item 9809.00.01 may include: small value ships' and aircraft stores; small value shipments of mixed goods; shipments of small value commodities associated with the initial installation of large scale projects. Goods requiring a permit should not be classified to this AHECC, but should be classified by kind. The exceptions are goods requiring an AQIS or Horticulture Australia permission and first aid kits.

Questions about the use of 9809.00.01 should be directed to the Classification Manager, telephone (02) 6252 5409. All other exports with values of \$5,000 or more per commodity (including ships' or aircraft stores in bond and subject to excise or Customs duty) should be recorded under their substantive AHECC items.

CHAPTER 99 Commodities and transactions not included in merchandise trade

This chapter includes goods that the United Nations defines as being outside the scope of merchandise trade statistics. Goods recorded in this chapter are known as non-merchandise trade and are not included in Australia's international merchandise export statistics.

Non-merchandise trade includes:

- goods exported after being imported on a temporary basis - ships, boats, floating structures, goods for public exhibition and goods originally imported under Section 162 or 162A of the Customs Act, e.g., racing cars and associated equipment for the Australian Grand Prix, NZ race horses for the Melbourne Cup, paintings for art exhibitions;
- goods exported on a temporary basis and intended to be re-imported;
- goods exported for repair, alteration or renovation and subsequent re-importation;
- goods re-exported from Australia after being imported for repair, alteration or renovation;
- passengers' personal effects for which a Customs entry is required; and,
- miscellaneous commodities and transactions not included in merchandise trade including:
 - ships' and aircraft stores not subject to excise or Customs duty being loaded on Australian registered ships and aircraft
 - Australian-owned airlines' and shipping companies' parts and equipment for use in servicing their aircraft or ships overseas
 - exports by the Australian government for Australian representatives abroad
 - exports by the Australian government for the administration of Australian territories.

1.5 INSTRUCTIONS FOR COMPLETING AN EXPORT ENTRY

The reporting of export details to the Australian Customs Service may be done electronically, through the EXIT system, or manually by completing the Export Entry forms, B957 (Nov 01) and B957(a) (Jul 2000). Exporters **must** report all export details **prior** to the goods being loaded on board the ship or aircraft transporting them out of Australia.

EXEMPT GOODS

The following classes of goods are exempt from Export entry requirements, unless there is any permit required by Customs or other permit issuing authority prior to export:

1. accompanied or unaccompanied personal or household effects of a passenger or crew member of an outgoing ship or aircraft, in reasonable quantities and not to be used in the course of trading outside Australia;
2. goods included in a consignment that is consigned by post, by ship or by aircraft from one person to another, and that has an FOB value not exceeding the current threshold (currently \$2,000).

This exemption **does not apply** to goods that are: dutiable goods where the duty is unpaid, excisable goods where the excise duty has been unpaid and goods for which a claim for drawback of Customs duty, excise duty or sales tax is intended;

3. military goods which are the property of:
 - (a) Australian Defence Forces - any value of military goods which are for use overseas by Australian Defence Forces and which will not be sold or otherwise disposed of outside Australia; and
 - (b) Foreign Defence Forces - any value of military goods which are for use in military exercises approved by the Australian Government and which have not been entered in an import entry;

4. bags of mail (Australia Post or Diplomatic);
5. goods originating in one Australian port or airport moved on an international vessel or aircraft to another Australian port or airport without intention to export;
6. goods temporarily imported under section 162A or temporarily exported under Australian carnet;
7. ship and aircraft spares for use only on an Australian owned vessel or aircraft; and
8. containers or pallets that are the property of a person carrying on a business in Australia and which are exported on a temporary basis to be re-imported, whether they are empty or loaded.

AGGREGATION OF LINES

Where all the details of a group of transactions within the consignment, other than quantity, value and gross mass, are identical, the transactions may be aggregated to a single line.

INSTRUCTIONS FOR COMPLETING EXPORT ENTRY - HEADER SCREEN OR COVER PAGE (FORM B957)

Each of the following instructions relates to a field on the Export Entry. The numbers shown beside the export entry fields as shown below do not necessarily relate to the item numbers of the fields on an export entry. Copies of manual Export Entry forms are included at the end of this Section.

SENDERS REFERENCE

Enter the reference assigned to the consignment. The reference **must be unique** to the particular consignment and cannot be used for any other consignment. To amend the declaration the reference **must be input exactly** the same as the original.

TYPE OF EXPORTER

There are three recognised types of exporters. They are:

- (N)on-confirming
- (C)onfirming
- (M)ultiline

Confirming exporters and Multiline shippers must be registered as such with the Australian Customs Service to use those facilities.

OWNER/AGENT (FOR EXPORT ENTRIES LODGED VIA EXIT ONLY)

Input "O" if the EXIT user is the owner of the goods to be exported.

Input "A" if the EXIT user is acting as an agent on behalf of the owner for the purpose of lodging export entries.

EXCISABLE/CUSTOMABLE

Customable/Excisable goods are goods which would be subject to Customs or Excise duty if they were to be delivered into home consumption rather than being exported. If the goods are customizable/excisable, show "Y" in this field and show the establishment code of the warehouse or excise premise from which the goods were removed in the Excise Establishment Code. If the goods are not customizable/excisable goods, show "N" in this field and leave the Excise Establishment Code blank.

Key of Changes

The key of changes presents a history of the AHECC classification since its inception in 1988.

Whenever an AHECC code changes it is closed and a new code or codes created. This information is presented in the form of a table. The first column (Previous code) indicates the code that closed. The next column (Replacement code) shows the code or codes that were created as a result of the closure of the previous code. The Date replaced column indicates the date this change occurred. The Expiry date indicates when a code used to replace a previous code was subsequently closed.

Note that an asterisk * preceding a code indicates that the change occurred on 1 January 2003.
